CQ18150 - Questions and Answers for Google Maps API

1. There's a significant range of cost based on what the intended use case is. We assess the usage and provide a quote based on how the credits are being used. 100,000,000 MAPs credits is not specific enough for us to provide you a useful range.
The questions we have surround what specific APIs are you intending to use, how often, and with how much data?

Answer: Please see following Excel Attachment of Usage.

2. I wanted to follow up with WMATA on this and just see if we, as the vendor, would bid on this and how we can (ie without the option year)?

Answer: WMATA will accept pricing of the Option Year. It is up to WMATA whether to accept and implement the option. This is subject to funding and Program's needs. But pricing must be submitted for Base and Option Year to be considered for award.
