SCOPE OF WORK

Introduction

The objective of the acquisition is to provide an environment which improves the ProWatch system(s), WMATA's Access Control system and optimal performance in WMATA's environment. WMATA expects the awarded vendor to design an update to the architecture to include; but may not be limited to, an installation of Honeywell's Software Development Kit (HSDK) license(s) on a primary and a secondary redundant sever in WMATA's current environment.

Background

WMATA's current version is ProWatch 4.2.0 with Neverfail v6.7 on a SQL Server 2008 R2 environment.

Presently, High Channel usage is causing performance issues, 111 channels are being used and more are expected to be used in the future.

Current Scope of Work

WMATA expects a turn-key solution for; Design, architecture, testing, implementation, training, and documentation. The work may be performed on-site or available remotely. Technical resources shall install and stand up the HSDK on the respective secondary server. This work should include the ProWatch upgrade. Once this optimization is completed, Vendor shall provide WMATA documentation detailing what was done in the form of a technical document and also an itemized implementation plan listing the service on server, application, licensing an SQL Server updates (all-inclusive implementation). WMATA also expects the following tasks will be part of the optimization and will be supported and/or completed as a part of this optimization:

Preventative maintenance with regard to setting up and maintaining WMATA's environment;
Provide best practice for server configuration including CPUs, and Memory;

The Pro-Watch based access control system shall support redundancy and be able to automatic failover and roll back;

Best design architecture that meets or exceeds existing WMATAs custom solution for access control management;

Information on the most effective and recommended use of channels so the solution provides the best approach and the most efficient use of channels;

Knowledge Transfer from Vendor technicians to WMATA technical staff to operate and maintain the environment after implementation;

Make sure the proper licenses are provided and installed;

WASHINGTON METROPOLITAN TRANSIT AREA TRANSIT AUTHORITY
REQUEST FOR QUOTATION

HSDK is configured and licensed as designed on both Primary and secondary redundant server with working integration of DR application (Continuity Engine, Neverfail);

HSDK is configured to proceed with the CNL integration;

Knowledge transfer from Vendor technicians to WMATA ITAPPS and Engineering on the installation and operations of the HSDK;

HSDK functions and communication channels shall remain unchanged after system fails over to the secondary server;

ProWatch Upgrade training and training collateral materials

The outcomes desired by WMATA are as follows:

Perform a System Optimization on the Pro-Watch server and database;

Improve ProWatch performance metrics;

Architect and implement an updated system design to include load balancing and redundant functionality to work with the existing communications servers;

An additional Pro-Watch HSDK license is required to support secondary redundant server;

A highly efficient and stable holistic backend environment with performance that scales to meet the increased load requirements over time;

SQL server upgrade to version 2016

ProWatch version upgrade to version 4.3

Deliverables

- System Design Documentation
- Architectural Diagram Documentation
- Test Documentation (Unit Test Document)
- Optimize performance of Pro-Watch
- Install HSDK licenses and configure servers for both Primary and secondary redundant server.
- ProWatch Upgrade training and training collateral materials
- Warranty of design and work completed

Performance and Acceptance Criteria

Performance increase based on before and after testing results

Failover redundancy based on testing

All of the changes to the WMATA environment must be documented and delivered to IT/APPS prior to close out and/or acceptance.

Successful functional testing prior to implementation

WASHINGTON METROPOLITAN TRANSIT AREA TRANSIT AUTHORITY

If the Contractor fails or refuses to correct or re-perform, the Contracting Officer may, by contract or otherwise, correct or replace the services with similar services and charge the Contractor with the cost, or make an equitable adjustment to the Contract price.

- (d) If WMATA does not require correction or re-performance, the Contracting Officer shall make an equitable adjustment to the Contract price.
